

Tenth International French Speaking Conference on Logic and Constraint  
Programming  
Colocated with ASTI'2001  
April 24-27, 2001  
Cité des Sciences, Paris, France

**JFPLC'2001**

**Président**

P. Deransart . . . . . INRIA, FRA

**Président of Program Committee**

Ph. Codognet . . U. Paris 6, FRA

**Program Committee**

H. Ait-Kaci Simon Fraser U., CA  
K. Apt . . . . . CWI, NL  
C. Bessière . . . . . LIRMM, FRA  
Y. Caseau . . . . . Bouyges, FRA  
A. Colmerauer U. Marseille, FRA  
V. Danos . . . . . CNRS, FRA  
P. Deransart . . . . . INRIA, FRA  
G. Dowek . . . . . INRIA, FRA  
F. Fages . . . . . INRIA, FRA  
G. Ferrand . . . . . U. Orléans, FRA  
J-K. Hao . . . . . U. Angers, FRA  
P. Jegou . . . . . LIM, FRA  
F. Mesnard U. La Reunion, FRA  
E. Monfroy . . . . . U. Nantes, FRA  
A. Podelski . . . . . MPI, D  
J-F. Puget . . . . . ILOG, FRA  
P. Van Hentenryck . Brown, USA

**Organising Committee**

A. Aggoun . . . . . Cosytec  
F. Barbara . . . . . INRIA  
C. Demars . . . . . INRIA  
A. Ed-Dbali . . . . . U. Orléans  
A. Theis-Viemont . . . . . INRIA

**Inquiries**

[jfplc2001@inria.fr](mailto:jfplc2001@inria.fr)

**Important Dates**

*Abstract* . . . . . **January 8, 2001**  
*Submission* . . . . . **January 8, 2001**  
*Acceptation* **February 10, 2001**  
*Final Version* . . **March 8, 2001**

**Sponsors**

The tenth International French Speaking Conference on Logic and Constraint Programming of the AFPLC (<http://www.afplc.org>), JFPLC'2001, is part of the inaugural conference of ASTI'2001 (<http://asti.asso.fr>) and will be organized in Paris at the "Cité des Sciences" of La Villette. The aim of the meeting is to review recent research work on the conference topics with a particular focus on the interactions between the different aspects of logic programming, constraint resolution and programing, and their application domains. JFPLC'2001 follows the series of previous meetings which took place in Marseille (2000), Lyon (99), Nantes (98), Orléans (97), Clermont-Ferrand (96), Dijon (95), Bordeaux (94), Nimes (93) and Lille (92).

The technical program of the conference will include invited conferences, presentations of refereed papers, posters and demos (both subject to a forthcoming specific call), common sessions with related conferences of ASTI'2001, and exhibition.

The proceedings will be published by Hermès. Official conference languages are French and English. Papers may be submitted in English, but should be published in French if one of the author is native French speaker.

A special award will be given to the best paper presented by one or several young researchers (none of the authors having defended his PhD thesis before *December 31, 2000*). Authors meeting this requirement must mention it when submitting.

**Scope :** Papers are welcome on all theoretical or experimental aspects of logic programming and/or constraint programming, including, but not limited to :

- Logic Programming
- Constraint Programming
- Constraint Resolution and Optimisation
- Logic Foundations
- Theory and Foundations
- Constraint Database
- Deductive Database
- Parallelism and Concurrency
- Applications
- Methodology
- Constraint Satisfaction problems
- Over-constrained Problems
- Local Search
- Inductive Logic programming
- Static Analysis
- Programming Environment
- Language Conception and Implementation
- ...

**Submissions :** Authors are invited to send papers not exceeding *15 pages*, formatted according to the JFPLC'2001 style (available on the WWW conference site). Papers should contain original, previously unpublished results (neither in a conference nor in a journal). Accepted papers should be presented at the conference.

Electronic submissions are strongly encouraged and should be made before *January 8, 2000* as a standard postscript file from <http://conference.inria.fr/jfplc2001>. Details are provided on this URL. An abstract should also be provided, together with the title, authors, keywords of the paper and the name, addresses (surface and electronic mail), phone and fax numbers of the main author.

When electronic submission is not available, authors should send six copies of the paper to the program committee chairman at the following address before the deadline: JFPLC2001, LIP6, case 169, Université de Paris 6, 8, rue du Capitaine Scot, 75015 Paris, France.

The first colloquium of ASTI (Association Française des Sciences et Technologies de l'Information), ASTI'2001, gathers 15 events in the same location, organised by the founding associations (among them, AFPLC), with a joint common day (April 25). It will offer a unique oportunity to meet and exchange between academic as industrial partners as well. All informations about ASTI and the colloquium: <http://asti.asso.fr/>.
